

# KEEPING US ALL SAFE DURING CONSTRUCTION WORK

We'd like to take a moment to explain some aspects of keeping you and the **J&D Contracting Team** safe while conducting your repairs or renovations.

Please don't cross a **BARRIER** that we put in place. It's there for your safety as well as ours.

From time to time, we may isolate the power, gas or water while we are on-site. When we do, we use **TAGS** on the main isolation points to let everyone know that our workers could be exposed to risk if the switch or valve was turned on. If you see a tag, **NEVER** turn it on. It's there for our protection.

Not every **ANIMAL** will love our on-site team. Please ensure that your animals are restrained while our team is on-site.

We have an obligation to keep our team members health at work. That means keeping our workplaces **SMOKE FREE**.

If you have any **SHARPS** or **SYRINGES** in the work area that you use for health reasons, please make sure these are removed prior to our team commencing work.

You might like to remove your **MEDICINES** or other objects that you might need before we commence work at your property.

Please keep your kids safe and away from our work areas. **CHILDREN** and tools aren't always a good combination.

Please ensure that you advise us if you have any **FLU-LIKE SYMPTOMS** like a fever, runny nose, dry cough or tiredness.

**Thanks again for taking the time to help us keep you and our great team of workers safe.**
